

CASE STUDY

A++ Grade University

9 years of enabling cybersafe operations for the 9th ranked university in India

The A++ Grade University has Set International Benchmarks for Academic Excellence. They Rely On K7's Technology, which has Set Similar International Benchmarks in Cybersecurity, to Protect Their Campuses.

Client Snapshot	
» 13,000 endpoints	The A++ Grade University offers 40 Undergraduate, 37 Postgraduate, and 13 integrated programmes across 4 campuses. Such complex, large scale, and distributed operations require robust IT infrastructure to offer a seamless stakeholder experience. K7 Security ensures students, staff, and administrators enjoy reliable access to IT resources without disruption from cyberattacks.
» 9 th Ranked University (NIRF)	
» A++ Grade (NAAC, MHRD)	
» 300+ International Partners	
» Private Deemed University	

Cybersecurity for Pre-eminent Education

The Client's Requirements

- Robust protection
- Efficient cybersecurity
- Scalability
- Low IT team effort

The K7 Solution

K7 Security's Endpoint Security (K7 EPS) is designed to provide the reliability required by the world's most distinguished and exacting institutions while ensuring low consumption of computing and human resources.

World Class Cybersecurity

The client's management prioritised the effectiveness of cyber protection as their previous solution provided inadequate security that resulted in unacceptable operational disruption. They were reassured by the numerous international awards received by K7 which have been validated by the exemplary protection enjoyed by the client over the last 9 years.

Unimpaired Performance

The client's IT team were concerned by the resource consumption of cybersecurity solutions as their previous solution had affected device performance and user productivity due to excessive consumption of computing resources. They were delighted that K7's solutions are world renowned for low-impact protection, which has been consistently proven every day in the client's operations over 9 years.

Scalable Security

The client adds users at every campus every year. Their IT team were keen to ensure scalable cybersecurity as their previous solution experienced instability with increase in user base. They are pleased that the K7 EPS console remains stable and endpoints reliably sync with the console despite frequent increase in users, ensuring cybersecurity standards are maintained at all campuses all the time.

Minimal IT Team Intervention

The client's management were concerned about the rising manpower cost associated with cybersecurity as their previous solution required dedicated human resources to troubleshoot issues and manage multi-campus cybersecurity. They were relieved to know that K7 EPS simplifies cybersecurity settings, has a highly intuitive interface, and minimises intervention and effort from the IT team. The client has not required dedicated cybersecurity staff since transitioning to K7 EPS.

Why The Client Chose K7

- International award winning cybersecurity
- Low-impact protection
- High scalability
- Effortless cybersecurity management

K7 Security delivers the excellence in cyberthreat protection demanded by organisations that aspire to meet and surpass international standards. [Contact Us](#) to learn more about how we can help you secure your expanding enterprise against rising cyberattacks.
