

K7 Cyber Protect 360 – EDR

Endpoint protection with EDR, delivering
centralised visibility and control over
enterprise digital infrastructure

The modern enterprise has to defend business operations across multiple facilities against an expanding threat landscape while facilitating new, digitally-enabled workflows, geographically distributed workforce, and heterogeneous digital infrastructure.

Preventing cyberthreat activity and maintaining undisrupted operations is emerging as a strategic priority for businesses, as cyberattacks have the potential to significantly impact financial results and brand value, and may even cause cessation of operations. Cybersecurity solutions have to effectively defend against such adverse consequences while minimising consumption of digital, financial, and human resources.

K7 Cyber Protect 360 – EDR

Unified Cybersecurity with Centralised Management

Comprehensive Enterprise-wide Protection

K7 Cyber Protect 360 – EDR collects and correlates security event information across endpoints, logs, and email to surface threats.

Dashboards

EDR

Incident Response

Threat Hunting

Log Management

Integrated Cybersecurity

SIEM with integrated XDR and ingestion of third-party data from diverse vendors across endpoints.

SIEM

Integration

Asset Inventory

Enhanced Insight without Enhanced Effort

Centralised view of enterprise digital infrastructure ensures no dark zones and delivers quick identification of threats that would otherwise be invisible. Dashboards and visualisations help security teams monitor problematic areas without compromising their across-the-enterprise view.

Alerts

Analytics

Application Logs

Reports

Scalable Security Management

Intelligent automation helps security teams orchestrate response and minimise human error at any scale of operations.

Automated Response

Live View

Enhanced Compliance

Multi-jurisdiction compliance is simplified with online compliance monitoring and dashboard. Continuous File Integrity Monitoring (FIM) enables data security. Device Control prevents data exfiltration through USB storage devices, printing, and Bluetooth.

Device Control

File Integrity Monitoring

Compliance Tracking

Highlights

- AI-enhanced, real-time, MITRE ATT&CK based threat detection
- Supports ingestion of proprietary and third-party threat intelligence feeds
- Automated threat containment and mitigation
- Quick, easy deployment with no additional hardware/VM footprint
- Comprehensive log management with analysis of real-time and archived logs using an easy-to-use query language
- Security configuration assessment
- Hardware and software change monitoring
- 24/7 threat monitoring, threat hunting, and analysis
- Single dashboard view of, and search across, all cybersecurity assets
- Compatible with Windows, Mac, and Linux

Features & Addons

Features

- EDR
- Advanced Malware and Zero-Day Protection
- Enhanced Anti-ransomware with Remote Ransomware Protection
- Safe Mode Protection
- Web Security
- Advanced Device Control
- Application Control
- Registry Cleaning
- Asset Management

Addons

- SIEM/SOAR/Log Management
- Data Loss Prevention (DLP)
- Backup & Restore
- Threat Intelligence
- Vulnerability Management
- Compliance Management
- Disk Encryption
- Patch Management

Powered by the World #1 in Performance

K7 Cyber Protect 360 – EDR is powered by K7's proprietary scan engine that performs AI-assisted threat evaluation and blocking at the endpoint, delivering attack protection at the edge and avoiding the delay in communicating with the cloud for routine security activity.

The K7 scan engine is renowned for its efficiency and is proven to protect without impacting device performance.

Why Choose K7?

Unparalleled Expertise

K7's principals have responded to several of the largest incidents in the world, supported CERT-IN, and led investigations and remediation efforts in the GCC and India.

Wide Industry Exposure

K7's clients span several sectors, including finance, retail, telecom, media, technology services, maritime, university, legal, and government.

Superior Trust

K7 has helped harden the servers of defence organisations to prevent infiltration.

Superior Knowhow

K7 has been involved in various research and development efforts aimed at assuring compliance and automating threat detection.

About K7 Cyber Security

K7 Cyber Security is a cyber security pioneer with over 30 years' expertise in preventing cyber attacks, and one of a few global cyber security providers with a proprietary scan engine. K7's enterprise security solutions include MDR and XDR platforms; EDR, endpoint, and network security solutions that protect any size and type of business without affecting device or network performance and are designed to protect modern organisations with a remote or hybrid workforce; and cyber security services that provide assured compliance and threat defence.
