

DATA SHEET – K7 SOHO SECURITY

Digital transformation which has been radically occurring in all aspects. Technology driven business changed the way of interaction with their customers and product development process. Mutually when organization transforms, security and protection of their data should be an integral part.

As digital world changes, the way of protecting our data and securing our network has been changed enormously. With digital transformation, Cybercriminals are simultaneously growing by creating efficient threats and risk averse mode of operation. Integrated comprehensive security solutions with centralized management console is needed to decrease costs and complexity for an enterprise network.

K7 SOHO SECURITY

TOP-NOTCH ENDPOINT SECURITY FOR YOUR BUSINESSES

Unsecured Network results in:

- ✚ Leaks of confidential information
- ✚ Intruders can easily hack into the network
- ✚ Low performance of system
- ✚ Malicious files like viruses, Trojan, bot, adware's, rootkits can affect the system files

K7 Soho security provides the complete advanced protection solution for your small office/home network needs. Protects yourself from direct financial loss by the likes of Ransomware, indirect loss due to productivity loss, down time caused by cyber-attacks.

Advanced Cerebro technology that incorporates artificial intelligence providing a proactive approach to detect and prevent the most advanced attacks ensures Zero day protection. Sophisticated end-point protection is needed for every device since a single infected system can crash an entire network, which will put your organization at a loss.

All kinds of gateways can be sealed from intrusion attacks to prevent the leakage of confidential data with K7 Soho Security. Gear up with K7 Soho Security to fight against ransomware, malware, viruses, spyware, worms and hackers. Also, provides excellent support with Zero-day protection.

Key Features

Centralized Web Console

With centralized console, you get absolute control over all node across the entire network, giving you a high level of manageability for effective security implementation. Customize security changes across your organization with a single click.

Real time protection

Cutting edge technology engine works constantly and protects your entire network without affecting performance of any system. Instant notify if any malware threat try to inject your file.

Proactive Defence Method

Using concept of behavioral blocking, artificial intelligence and machine learning we protect all your system files from known virus and new ones which is yet to be discovered.

K7 Cerebro Engine

Ultrafast and Scalable scanning engine which is capable of detecting not only the existing threats and also emerging threats by using artificial intelligence and machine learning. Its proactive approach which can detect and prevent the most advanced attacks ensures Zero day protection.

Root Kit Scanner

With most advanced detection technology detects any hidden root kit in all the clients system. It helps to prevent affecting any file by new rootkit though.

Installation Made Easy

Installation is way easier and no need follow installation guide. Single click to get node installation setup, Silent installation and remote client installation made all way easy.

Email Protection

We take control of your mailbox and filter from all unwanted malicious content and spam. By using Bayesian filter we detect and block all emails contains viruses, key loggers, junks and phishing attacks.

Secure File Servers

On real time it scans all files accessed, downloaded, created or modified across each endpoint by the user. Protects all the sensitive data from malware threats.

Internet gateway security

Detects the location of endpoints both offline and online and combats hostile intruders. Pro-active protection for all your endpoint users from potential threats

Administrator Console Requirements

Operating System	Windows Server 2003 (SP2) – Any Edition Windows Server 2008 – Any Edition Windows Server 2008 R2 – Any Edition Windows Small Business Server 2011Any Edition Windows Server 2012 – Any Edition Windows XP (SP2 or later) Windows Vista (SP1 or later) Windows 7/ 8 / 8.1
Database	SQLite Database
Hardware	512 MB RAM (minimum), 700 MB Hard Disk Space, High resolution Video Adapter and Monitor
Browsers	Internet Explorer 8 or later (You can also use other web browsers such as Firefox, Google Chrome, etc.)
Internet	Internet connection is required for activation and updates

K7 Endpoint Protection

Operating System	Windows XP (SP2 or later) (32 Bit Only) Windows Vista (SP1 or later) Windows 7/ 8 / 8.1 Windows Server 2003 (SP2) – Any Edition Windows Server 2008 – Any Edition Windows Server 2008 R2 – Any Edition Windows Small Business Server 2011 – Any Edition Windows Server 2012 – Any Edition
Hardware	512 MB RAM (minimum), 300 MB Hard Disk Space, High resolution Video Adapter and Monitor
